

Web Development & Design

Custom OSP Page (Trumpia)	Designing a webpage on Trumpia's platform and integrating Trumpia's API to create a custom signup page.
Custom OSP Page (Third Party)	Designing a webpage on Trumpia's platform and integrating Trumpia's API to create a custom signup page and push data to a third party platform (a.k.a. Contact Sync)
Custom OSP Form Embed (Trumpia)	Designing a form for the Customer's website and integrating Trumpia's API to send data to Trumpia.
Custom OSP Form Embed (Third Party)	Designing a form for the Customer's website and integrating Trumpia's API to send data to Trumpia AND send data to a third party platform (a.k.a. Contact Sync).
Reseller Template Text Change (Individual Page)	Changing text content on an existing English content field on the reseller site.
Reseller Template Graphics & Image Asset Change (Individual Page)	Changing graphics and images on the reseller site. Graphics may be requested by or provided by the client.
Reseller Template Signup OR Contact Us OR Login Page Change	Design changes can be made to any of the purchased reseller pages.
Site/Event Tracking Integration	Integration of web and event tracking feature with customer's website.

Contact Synchronization

One-way Contact Synchronization	Custom integration to connect client's existing platform to Trumpia's platform via API.
Automated Contact Import from File	Custom script to search through contact files provided by client to synchronize contacts to Trumpia's platform via API.
FTP Server File Upload	Custom script to upload requested client data to an FTP server on a set schedule.
Zapier Contact / Lead Creation	A Zapier powered contact connector sync. Connected platform must have a Zapier integration.

Zapier Automated Opt-Out

A Zapier powered automatic opt-out sync. Connected platform must have a Zapier integration.

Reporting & Queries

Automated Export of Inbound Message Logs

Automated export of inbound message logs to an FTP server or email. If uploading to FTP server, requires additional FTP dev work.

Live Page for Polling Results or Inbound Messages

Synchronization of Trumpia inbound messages to an online report.

Custom Data Query (Manual Report Generation)

A custom SQL query report manually generated once a month. Must be approved by IT Ops.

Custom Data Query with Automated Report Delivery

A custom SQL query with automatic report generation and delivery. Must be approved by IT Ops.

Advanced Solutions

Custom Messaging Portal

A web portal for custom or specialized messaging needs. Includes user login and a messaging page powered by Trumpia's API.

Custom Messaging Logic (requires Custom Messaging Portal)

Custom development to augment or limit messaging abilities on a custom messaging portal.

Service Fees

Custom Application Hosting and Maintenance

An annual fee that includes the deployment of the application to a specialized server hosted by Trumpia and ongoing maintenance (regular upkeep activities, no upgrades).

Priority Application Servicing and Support

Preferred client service and escalation for application changes and additions. Does not include the billing for actual development work on new changes. Charged annually.
